

HEALTHCARE ANALYTICS

Portfolio Case Study

Healthcare KPI Performance Review

Demo Case Study

A portfolio case study demonstrating end-to-end KPI reporting: data structuring, executive-ready summaries, and visual performance storytelling.

Prepared by **Renad Aldous**

Data Analysis · KPI Reporting · Performance Dashboards | 2026

All KPI values, department names, organizational details, and visuals in this case study have been anonymized, modified, or recreated for portfolio demonstration purposes. No confidential organizational data is displayed.

About This Demonstration

All KPI values, department names, organizational details, and visuals in this case study have been anonymized, modified, or recreated for portfolio demonstration purposes. No confidential organizational data is displayed.

Division Scope & Role

This demo simulates a healthcare performance reporting function responsible for tracking service-line KPIs across multiple departments and regional units. The role covers performance monitoring, standardized reporting cycles, and translating operational data into executive-ready insight.

What This Case Study Shows

- Structuring raw KPI data into a performance dashboard
- Strategic and executive-level KPI summaries
- Root-cause analysis and action-planning for underperforming KPIs
- Sample department-level KPI scorecards

Overall Performance Dashboard

Strategic KPI Summary

KPI	Actual	Target	Ach. %
Service Accessibility	96.8%	96.5%	100.3%
Operational Excellence	89%	90%	98.9%
Quality Performance	90.5%	79.0%	114.6%
Customer Experience	85.0%	84.6%	100.5%
Strategic KPI E	2.6	2.5	104.0%
Strategic KPI F	80.1	77.8	103.0%

Executive KPI Summary

Objective	Target	Actual	Ach. %
OBJ-01 Objective A — Governance & Access	100%	115%+	115%+
OBJ-02 Objective B — Recognition & Benchmarking	100%	115%+	115%+
OBJ-03 Objective C — Standards Adoption	100%	100%	100%
OBJ-04 Objective D — Resource Optimization	100%	78%	78%

Watch item: Objective D underperformed at 78% — driven primarily by a 0% result on a related coverage sub-metric (Service Coverage Rate) against a 40% target. Tighter reporting integration is required to capture true activity.

Performance Analysis

Top Performing KPIs

- Strategic KPI F sustained strong, consistent performance across the full reporting cycle.
- Quality Performance improved steadily — a +3-point gain over the start of the cycle.
- Customer Experience exceeded its benchmark, reflecting consistently positive service ratings.

Bottom Performing KPIs

- Service Coverage Rate achieved 0% against a 40% target — no data captured despite active operations.
- Strategic KPI E remained close to flat across the cycle, indicating limited movement.
- Operational Excellence, while trending favorably, remains below its long-term benchmark.

Achievement % by KPI (vs. 100% Target)

Root Cause & Action Plan Example

Focus KPI: Service Coverage Rate (Target: 40%, Actual: 0%)

Root Cause

No structured data-submission mechanism exists between reporting sites and the central dashboard. Manual processes are not integrated with the underlying system, resulting in complete data invisibility despite real activity in the field.

Action Plan

Activate system integration between site-level reporting and the central dashboard. Mandate monthly reporting. Set an interim milestone for the next cycle, building toward full target coverage by the following cycle.

Status

In Progress — integration scoping underway with the data systems team; first monthly reporting cycle targeted for next period. Owner and deadline tracked in the departmental action log.

Expected Impact

Improve reporting visibility

Increase KPI coverage

Support executive decision-making

Improve reporting consistency

Sample KPI Scorecard

Illustrative regional scorecard — sample data, recreated for demonstration purposes.

Region	KPI-06 (Target ≥75%)	KPI-07 (Target ≤5%)	KPI-08 (Target ≥80%)	RAG Status
Region A	78.4%	1.2%	92.0%	On Track
Region B	65.1%	3.8%	88.5%	At Risk
Region C	81.7%	0.6%	95.3%	On Track
Region D	59.2%	4.9%	74.0%	Off Track
Region E	76.0%	1.9%	90.1%	On Track
Region F	83.3%	0.9%	96.8%	On Track

RAG legend: On Track ≥ 80% of sub-targets met • At Risk 60–79% • Off Track < 60%. Status reflects sample data only.

My Contribution

Analyzed KPI datasets and identified performance trends

Structured executive-ready KPI reporting presentations

Developed department scorecards and performance summaries

Communicated insights through clear visual reporting

Supported leadership decision-making with KPI analysis

Tools & Skills

Insight Communication

Key Takeaways

1

Data tells a story when it's structured well

Raw KPI feeds become decision-ready insight through clear categorization (strategic, executive, regional) and consistent reporting templates.

2

Executive audiences need the headline first

Leading with achievement rate, RAG status, and trend direction lets decision-makers act fast, with detail available for those who need it.

3

Root-cause framing turns gaps into action

Pairing underperforming KPIs with root causes and concrete action plans is what moves a report from reporting to driving improvement.
